

Hello party people,

Today we learned about the eastern cottontail rabbit and went over some important info for resumes/CVs and cover letters!

The Cottontail rabbit can run up to 18 mph, has almost 360 degree vision, and has 17,000 taste buds (and yet they still chose to eat grass).

Both powerpoints from today's meeting are attached below so you can go back and refer to them whenever you are making or editing your CV, Resume, and/or cover letter. As a reminder, handshake and linkedin are great places to start searching for jobs and to start networking.

We have a fundraising opportunity coming up. We are doing a can and bottle drive starting now. Return cans and bottles and send the money you receive to the ZSA venmo account. The proceeds will be going to the Dian Fossey Gorilla Fund international. A non-profit that works to conserve and protect gorillas in Africa.

We have the natural science career fair prep October 5th. Check out handshake for details.

As always we meet every Tuesday 7-8pm <https://msu.zoom.us/j/9936201129>
