

Hello my fun furry friends,

Tonight we had Dr. Jason Gallant come to speak to us about his research on electric fish. Because the electric fish give off such low electric shocks the ZSA E-Board would definitely be able to beat up the electric fish.

Do you like pizza and/or don't hate the environment? we are having a fundraiser on March 21st at pizza house! The proceeds will go to a wildlife fundraiser TBD. This fundraiser works both in-person as well as online orders. Have an excuse to treat yourself and spend money!

Still looking for a summer opportunity? Check out the IBIO hands-on database and the FW job board https://www.canr.msu.edu/fw/employment/fisheries_wildlife_employment/
